---

## Summary:

Motivated and detail-oriented Computer Science student with over 2+ years of coding experience. Proficient in various programming languages and passionate about software development. Quickly learns and applies new technologies. Seeking to leverage academic knowledge and coding skills for innovative software engineering projects

---

## Skills:

- Languages - Java | Javascript | C++ | Python
  - Development - ReactJS | NextJS | NodeJS | Express | Redux | MySQL | Supabase | MongoDB | Supabase | Tailwind | Git
  - Coursework - Data structures and algorithms | OOP | Applied Statistics | Linear Algebra
  - Others - Communication skills | Problem solving | Team management | Leadership
- 

## Education:

### BACHELOR OF TECHNOLOGY

2021 - 2025

Technocrats Institute of Technology, Bhopal, IN  
Major in Computer Science - AIML

### HIGHER SECONDARY SCHOOLING

2020 - 2021

Life Academy HS school  
PCM - 93.4%

---

## Projects:

### DoNow

05/2024 - 06/2024

- A Task manager application to track all your TODO work. It is Developed using NextJS & ReactJS for the seamless UI, Prisma, and MongoDB to manage the database.

TOOLS USED: ReactJS, NextJS, Tailwind, Prisma, and MongoDB.

### FeastFleet

07/2023 - 08/2023

- Fully functional E-commerce food-delivering website.
- Functionality such as ordering food, adding or removing items from the cart, and a secure payment gateway implementation using Stripe.
- Developed using MERN tech stack.

TOOLS USED: ReactJS, NodeJS, Express, MongoDB, and Stripe payment gateway.

### Spotify Clone

04/2023 - 04/2023

- Clone of Spotify music application.
- It mirrors the functionality of Spotify with efficiency and style. • blends server-side rendering and dynamic interfaces.
- It has a payment gateway, robust database management, and sleek styling for a seamless user experience.

TOOLS USED: ReactJS, NodeJS, Express, Supabase, and Stripe payment gateway.
